11c Compstall Road
Marple Bridge
Stockport SK6 5HH (GB)

(54) Network appliance for enhanced television services

(57) Enhanced television services are delivered and presented on a network appliance without the need for an enhanced-content enabled television set or set-top box. The enhanced content is decoupled from the television signal (or radio signal), allowing for the presentation of the enhanced content alone on a stand-alone network appliance. The network appliance may be a handheld computing device (e.g. a "palm" computing device), a tablette, a remote control with a display or a digital cellular phone handset with a display. The network appliance is enabled for Internet or Intranet access and is also provided with an infrared transmitter so as to operate as a remote control for a television (or radio) having an infrared beam receiver. Through use of the network appliance, the viewer would be presented with the same enhanced content on the network appliance as would be presented to the viewer if an enhanced content enabled television or set-top box (or radio) were being used.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 30 9284

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
